

Contents General Description

1.0 Introduction.....	2
2.0 Multipliers (correction factors).....	2
3.0 (Scheduled) overtime and effect on Labour Norms	2
4.0 Definitions of direct costs versus indirect costs	3
4.1 Site facilities	3
4.2 Overhead.....	3
4.3 Profit & Risk.....	3
5.0 Schematic overview of direct and indirect costs	4
6.0 Measurement.....	5
7.0 Validity.....	5
8.0 Conditions	5
9.0 Productivity and Efficiency.....	5
10.0 Labour Norms.....	6
11.0 Elements that are included in the Labour Norms	7
11.1 Personal care	7
11.2 Disruptions general.....	7
11.3 Start and completion of the activities	7
11.4 Housekeeping	7
11.5 Extra man allowance	7
11.6 Moving time allowance	8
12.0 Construction site allowance	8
12.1 Construction site state	8
12.2 Safety and environmental requirements	8
13.0 Corrections to the Labour Norms, i.e. conditioning of Labour Norms	9
13.1 Walking distance to workplace	9
13.2 High working spaces	9
13.3 Under ground / low rooms (cellars).....	9
13.4 Enclosed spaces	10
13.5 Dust, temperature development	10
13.6 Increased concentration of released gases	10
13.7 Use of protective clothing in case of work in e.g. chemical environments	10
13.8 Congestion	10
13.9 Normal weather conditions	10
14.0 Activities not directly related to the execution of the work	11
14.1 Project-related activities (other direct costs and overheads)	11
14.2 Activities not directly related to the execution of the work (indirect costs)	11
15.0 Fire watch.....	11
16.0 Waiting time.....	12
17.0 Labour rates, built-up of hourly rates.....	13
18.0 Calculating with multipliers (correction factors).....	14
Appendix 1. Direct Labour rate.....	15
Appendix 2. Example productivity and efficiency.....	16

Overview chapters CD-Rom DACE Labour Norms

- General
- Civil
- Equipment Installation
- Structural Steel
- Piping
- Painting
- Insulation
